Set composition and construction materials

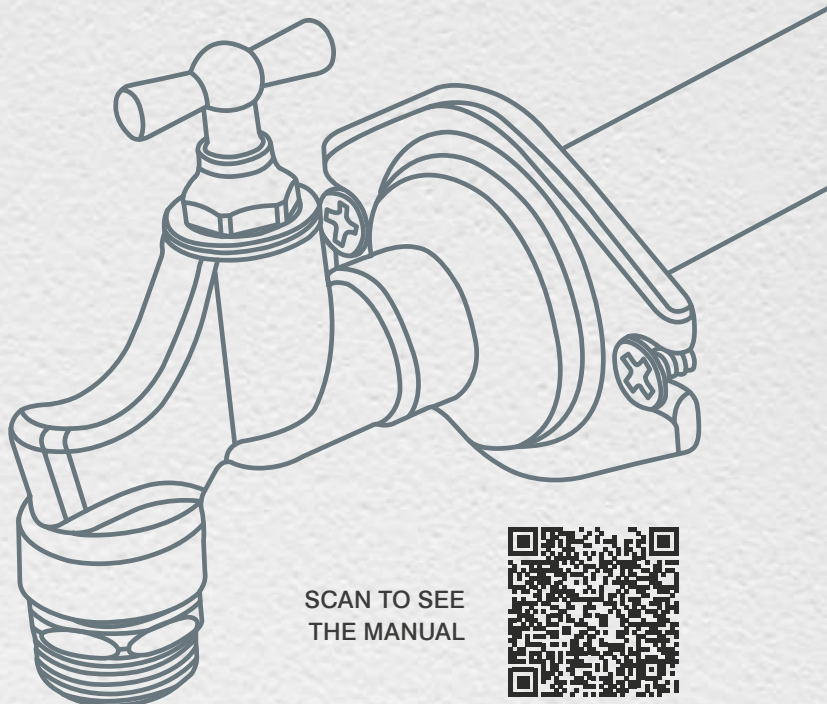

1. The pipe part, made of stainless steel, with 3/4" male thread.
2. Valve head with a 3/4" for garden hose connection – nickel-plated brass.
3. Rosette for anchoring the pipe part from the installation connection side – plastic.
4. Plastic valve head seat template (may be used for disassembling the connection between the valve head and the pipe part - "Click" connection).
5. Dowels and screws – plastic / carbon steel.

KAN-therm frost-resistant garden tap is an innovative design developed for the needs of external water intake points, e.g. for feeding gardens. The principle of operation of the valve provides the possibility of water freezing in the pipe part and the valve head itself. Thanks to its special design and the highest quality materials used, the product is resistant to water freezing.

- **Name:** Frostproof garden tap
- **Order code:** 1709277001
- **Pressure and temperature resistance:**
 - minimum operating pressure: 0.5 bar
 - maximum pressure: 10 bar
 - maximum temperature: 80°C
- **Connection dimensions:**
 - internal connection on the installation side - 3/4" male thread
 - external connection for a garden hose - 3/4" male thread
- **Documentation:**

PZH certificate: BK / W0498 / 01/2019
and BK / W / 0206/01/2019,
The declaration of performance
No. 95 / KAN-DWU / 20
- **Warranty period:** 2 years
